

BID-001-Q07 Vendor RFQ Response

Vendor Quote: BID-001-Q07

Vendor: ValueMed Diagnostics (Value-oriented MRI supplier)

Legal Entity: ValueMed Diagnostics Private Limited

Registered Address: 77 Healthcare Plaza, Pune, India

Contact: Rohan Mehta, sales@valuemed.example, +91-91234-55770

Company Profile: 9 years in operation, 17 similar hospital references, local support partner in Pune and Mumbai.

Procurement: MRI System - MRI Machine

Commercial Offer: INR 17.60 Cr base package price. Price includes MRI hardware, delivery, basic installation support, standard warranty, and first-year preventive maintenance. AI-based organ coloring and infected tissue detection are not included in the base price and are available only as future paid software options.

Advance Payment and Security: 25% advance payment. 35% on delivery, 30% after installation, and 10% after acceptance. Bank guarantee is available for the advance but must be requested in the purchase order.

Delivery and Warranty: Delivery in 4.5 months. Warranty starts on installation. Warranty duration is 24 months.

Installation Responsibility: Vendor provides installation supervision and commissioning support. Buyer is responsible for site readiness, electrical readiness, shielding readiness, and local rigging support.

Clinical Capability: Includes core MRI imaging, routine scan protocols, and standard radiology workflow export. Does not include AI organ coloring, AI infected tissue detection, or advanced artifact detection in the base quote.

Training and Handover: Training included for MRI technicians and biomedical engineering users. Radiologist workflow training is optional and separately quoted. Training plan gives two onsite sessions but does not define competency evidence.

Service Support: 24-hour response target, local service partner, annual preventive maintenance, and spare-parts support subject to availability. No explicit resolution-time target, uptime commitment, service credits, or remedy for missed SLA is stated.

Compliance Claims: IEC 60601 and ISO 13485 claimed. Local regulatory approval documentation will be submitted before final technical evaluation.

Acceptance Criteria: Installation report and basic image-quality demonstration are included. AI workflow demonstration is not applicable because AI modules are not included.

RFQ Requirement Coverage Statement: The vendor covers core MRI imaging and basic delivery obligations at a lower price, but clinical AI requirements, commissioning-linked warranty, detailed service remedies, and full lifecycle software disclosure require negotiation or add-on pricing.

Commercial Note: This quote is positioned as a lower-cost alternative. It may be

suitable if the buyer reduces clinical AI value weighting or treats AI organ coloring and infected tissue detection as optional future modules.
