

Agentic Vendor Cost Intelligence

Research, Gap Analysis, Problem Statement and Proposed Solution

Existing Procurement Solutions

- Zycus, Coupa, and Ivalua provide:
- Supplier Management
- Strategic Sourcing
- Contract Management
- Spend Analytics
- Procure-to-Pay
- AP Automation
- Compliance & Governance
- AI Capabilities
- Integrations

Industry Summary

- Existing solutions focus on automating procurement workflows, supplier management, sourcing, invoicing, compliance, and spend visibility using AI-assisted analytics and automation.

Target Domains

- Small Businesses
- Government / Restricted Domains

Key Procurement Challenges

Challenge	Business Impact
Human Approval Bottlenecks	Increased cycle time and operational cost
Compliance, Reliability & Observability	Audit risk and reduced trust in AI decisions
Procurement Knowledge Fragmentation	Loss of institutional knowledge
Contract & Data Silos	Slow and incomplete decision making
Reactive Procurement	Missed savings and risk mitigation opportunities
Vendor Cost Leakage	Hidden overspending through rate drift and invoice mismatches
Small Business Flexibility	Enterprise solutions are costly and process-heavy

Potential Gaps

- Vendor Cost Leakage
- Supplier Value-to-Cost Benchmarking
- Negotiation Opportunity Prediction
- Contract Drift Detection
- Knowledge Retention
- Flexible Compliance

Problem Statement

- Existing procurement platforms automate sourcing, supplier management, invoicing, and compliance. However, they provide limited proactive intelligence for detecting contract drift, vendor rate anomalies, invoice-contract mismatches, and renegotiation opportunities, leading to avoidable procurement costs.

Proposed Solution

- Agentic Vendor Cost Intelligence Platform
- Continuously analyzes contracts, invoices, vendor performance, and historical negotiations to identify cost leakage, explain anomalies, and recommend actionable savings opportunities.

Expected Benefits

- Reduced procurement cost leakage
- Improved contract compliance
- Early identification of rate anomalies
- Better negotiation outcomes
- Preservation of procurement knowledge
